### **Des-Case Corporation signs distribution agreement with Pall Corporation in Asia** *Representation in Asian countries further strengthened*

*White House, Tenn.* - Des-Case Corporation, a leading manufacturer of contamination control products, is pleased to announce it has reinforced its worldwide business with a new distribution agreement with Pall Corporation. This new agreement with Pall Corporation, in the Asian region, reflects an increasing global demand for Des-Case products.

By working with its distribution network in the Pan Asian region, Pall Corporation will further secure the market by supplying the full line of Des-Case products. Des-Case's principal breather line, which replaces the standard breather cap, uses patented technology to prevent damaging water and particulate from entering hydraulic reservoirs, gearboxes, and storage or process tanks. Des-Case breathers are offered in a variety of sizes and materials to meet the needs of virtually any industry application and are complemented by a line of ancillary contamination control products.

"We are very pleased to sign this important distribution agreement with one of the largest filtration companies in the world," said Brian Gleason, president of Des-Case Corporation. "We are optimistic about the region and are anxious to leverage our brands to increase market awareness over the course of this long-term contract."

-more-

Founded in 1946, Pall Corporation is the largest and most diverse filtration, separations and purifications company in the world with annual sales of approximately \$1.9 billion. The company employs 11,800 and has 59 facilities throughout the world.

Des-Case Corporation specializes in contamination control products for industrial lubricants with the leading position in the breather market. Headquartered in White House, Tenn., the privately held company markets the Des-Case®, Hydroguard™, VentGuard™, FlowGuard™, DoublePlay™, and TriplePlay™ brands through an extensive distribution network and private label partners. The company's products feature designs unparalleled in the marketplace and are used wherever lubricant life and performance are essential to daily operations.
